Ekart Seller Portal Handbook

A Complete Step-by-Step Guide to Managing Your Shipments

Welcome to the Ekart B2C Seller Dashboard! This handbook is designed to guide you through every feature of the portal, from your initial onboarding to managing daily shipments, handling exceptions, and utilizing advanced value-added services.

1. Onboarding & KYC

Before you can start shipping, you need to verify your account and complete the setup process.

Step-by-Step Process

1. **Pricing:** Select your preferred pricing plan (Flat Pricing or Tiered Pricing) based on your business needs. Your dedicated sales representative can assist with custom rate cards.
2. **KYC Verification:** Upload your company documents (GST, PAN, MSME, etc.) to verify your account.
3. **Bank Details:** Add your bank account information for COD remittance and settlements.
4. **Pickup Addresses:** Add the primary location(s) from where your shipments will be picked up.
5. **Channel Integrations (Optional):** If you use a website builder like Shopify, Wix, or WooCommerce, click "Connect" to sync your orders automatically.

2. Analytics Dashboard

The Analytics tab is your home screen, providing a bird's-eye view of your shipping performance.

- **Key Metrics Overview:** View live data on Manifested, Picked, In-Transit, Delivered, and RTO (Return to Origin) shipments.
- **Performance Insights:** Navigate through tabs (Overview, Pickup, In Transit, NDR/NPR, RTO) to analyze specific stages of your shipping lifecycle.
- **Zone-Wise View:** Check performance across different zones (Zone A, B, C, etc.) and specific states.
- **Date Customization:** Use the date filter at the top right to analyze specific timeframes (e.g., Today, Last 7 Days, This Month).

3. Shipments & NDR Management

This section tracks all live shipments from the moment they are created to their final delivery or return.

Tracking Live Shipments

Status	Description
Ready for Pickup	Newly created shipments land here. Click the Actions dropdown to download the label and invoice. Attach these to your package before the pickup agent arrives.
In Transit	Once picked up, shipments move here until they reach the destination city.
Delivered	Successfully delivered shipments reflect here following OTP verification.
RTO (Return to Origin)	Shipments rejected by the customer or undeliverable move here. You can view tags explaining the reason for the return.

Handling NDR Exceptions (Crucial for minimizing RTO)

Ekart offers up to 3 free re-attempts for undelivered packages. Look for shipments under the Action Required tab.

1. Navigate to the **NDR Exceptions** section on the Shipments page.
2. Identify shipments under the **Action Required** tab.
3. Call your customer to confirm their availability, address, or contact number.
4. Click on the shipment action, update the re-attempt date, alternate contact, or address if necessary.

5. Confirm the action to schedule the re-attempt.

4. Ship Parcel (Manual & Bulk)

Use this section if you receive manual orders via WhatsApp, Instagram, or Facebook and do not have an integrated website.

Step-by-Step Process

1. Go to **Ship Parcel > Forward Parcel Shipping**.
2. Enter the customer's Pincode, Address, Name, and Contact Number.
3. Select your designated **Pickup Address**.
4. Enter the Package Details (Length, Width, Height, Weight) or select a pre-saved Packaging Template.
5. Enter the Order Number, Invoice Number, Date, and Total Amount.
6. Select the **Payment Type** (Prepaid or Cash On Delivery).
7. Enter the Product Details and click **Create Shipment**.

5. Bulk Actions

To manage high volumes, you can perform actions on multiple shipments simultaneously using CSV uploads.

1. Navigate to **Bulk Actions**.
2. Select the action you want to perform (e.g., Reschedule Shipments, Upload RTO).
3. Click **Download Template**.
4. Fill in the required details in the downloaded Excel file.
5. Upload the completed file by dragging and dropping it into the upload box.

6. Packaging & Product Master

Save time during manual order creation by pre-saving standard box sizes and product SKUs.

Creating a Packaging Template

1. Go to **Packaging > Add New Package**.
2. Name your template (e.g., "Small Box").
3. Select the Package Type (Box, Envelope, Other).

4. Enter the standard dimensions and save.

Product Master

Go to **Product Master > Add Product** to enter your frequently sold items' details. This quickly populates them during manual shipping.

7. Order Management (Website Sync)

If you connected your Shopify, Wix, or WooCommerce site, your incoming orders land here.

1. Go to **Orders**. By default, new synced orders appear in the **Open** tab.
2. Select the orders you wish to fulfill.
3. Click the **Confirmation Tick Icon** in the Actions column.
4. Click the **Truck Icon** to view the estimated shipping price.
5. Confirm the shipment. It will now move to the **Ready for Pickup** status.

8. Wallet & Payments

The Ekart portal operates on a wallet-based prepaid system.

- **Wallet:** Click on **Payments > Wallet** to recharge your account. Shipping charges are automatically deducted from this balance.
- **Settlements:** View all COD order settlements here. You can download reports, check Next Settlement Dates, and view specific transaction IDs.
- **Billing:** Download your shipping invoices for accounting purposes.

9. Reports

Generate detailed MIS reports for your own tracking and accounting.

1. Go to **Report**.
2. Click **Generate New**.
3. Select the Data Filter (Dates), Shipment Types, and Payment Types.
4. Select the specific columns you want in your Excel file.
5. Enter your email ID and click **Schedule Report**.

10. Escalations (Support)

Raise support tickets directly with the Ekart operations and tech teams.

1. Go to **Escalations > Create New Escalation**.
2. Select the **Issue Type** (e.g., Forward Pickup, Tech Issue).
3. Select the **Sub-Issue Type**.
4. Enter the **WPN** (Tracking/Shipment ID).
5. Provide a comment explaining the issue and click **Submit**. The team aims to resolve escalations within 24-48 hours.

11. Settings & Value-Added Services

The settings panel houses crucial configurations and premium value-added services (VAS) to enhance the customer experience.

- **Addresses:** Add or modify pickup addresses.
- **Serviceability:** Download lists of serviceable pin codes.
- **Label Settings:** Customize your shipping labels and invoices.
- **API Settings:** Access developer API documentation.

Premium Value-Added Services (VAS)

Service	Pricing	Description
NDR AI Agent	₹8.00 per call	Enable this to have an AI automatically call customers whose delivery failed. The AI confirms availability and automatically schedules the re-attempt without manual intervention.
WhatsApp Alerts	₹1.00 per message	Send customers live tracking updates (Order Picked, Out for Delivery, Delivered) via WhatsApp, displaying *your* Brand Name instead of Ekart's.

Service	Pricing	Description
Branded Tracking Page	₹4.00 per shipment	Upgrade the standard tracking link to a premium branded page. Customize theme colors, add your logo, insert promotional banners, and link your social media profiles.
